

# Hilton Cake Portal

## Project Case Study

Type	Client	Location
Ecommerce Web App	Hotel Hilton	Trivandrum

### Client Overview

---

Hilton Garden Inn, A five star hotel based in trivandrum. They had a requirement for an ecommerce portal for delivering cakes which were prepared in house.

### Client Need

---

A web app to manage sale of cakes through fincorp branches. The process demanded being able to place an order for a cake at any of the 3500 branches in India. Finance section needed to view finance details of the system.

## Our Offering

---

We suggested to use .Net MVC Framework due to the excessive number of branches to optimize the scalability issues and the performance of the system

## Technology Used

---

### Web Platforms

.NET MVC Framework  
HTML5 Ccss3 Jquery

### Backend

SQL Server

## Challenges Faced

---

### → Challenge

Employees at the branches, who intended to use this system were not tech savvy

They needed something that even a new computer user could work upon

### Solution

We designed the UI and UX in the simplest way with easily understandable flow of process.

Displayed messages on pages for their assistance.

## Impact on Client Business

---

A simple web application with great UI and UX, satisfying all the requirements of the client. The officials at the client's end now has a systematic and efficient way of tracking
